

**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (currently amended) A method comprising:

opening an original document in a document viewing application, said original document being in a file in memory;

displaying a plurality of original document visual objects of said ~~[[an]]~~ original document;

inserting into the original document file a plurality of visual cue objects corresponding to print job ticketing parameters, thereby creating an amended document file, and displaying the plurality of visual cue objects; ~~[[and]]~~

removing from the amended document, for specific operations to be performed on the amended document, at least one of the plurality of visual cue objects, removed visual cue objects being included in a print job ticket responsive to ~~[[and]]~~ performing the specific operations;

forwarding said amended document and said print job ticket to a printer; and  
printing said amended document responsive said print job ticket.

2. (currently amended) The method of claim 1 wherein the specific operation is a save operation saving said print job ticket to storage for subsequent forwarding to print.

3. (currently amended) The method of claim 1 wherein the specific operation is initiating an immediate ~~[[a]]~~ print operation.

4. (currently amended) The method of claim 1 wherein said step of inserting further includes inserting an unseen marker with each of the plurality of visual cue objects, each

said unseen marker being inserted in said file and not displayed, and wherein said step of removing the at least one of the plurality of visual cue objects further includes locating the unseen marker in said file.

5. (currently amended) The method of claim 1 wherein said step of inserting further includes maintaining a list of each of the plurality of visual cue objects inserted in said file and wherein said step of removing the at least one of the plurality of visual cue objects further includes referencing the list and identifying the at least one of the plurality of visual cue objects to be removed from said file.

6. (currently amended) The method of claim 1 wherein said document viewing application is a document editor and ~~steps of~~ inserting and removing are performed by a plug-in to said [[a]] document editor providing a plug-in interface.

7. (currently amended) The method of claim 6 wherein the plug-in is further effective in performing the step of:

applying certain of the print job ticketing parameters to all pages of the document file.

8. (currently amended) The method of claim 6 wherein the plug-in is further effective in performing the step of:

applying certain of the print job ticketing parameters to selected pages of the document file.

9. (currently amended) A program product comprising:

a computer readable medium; and

program instructions on said medium which, when executing on a processor, are effective to:

open an original document in a document viewing application, said original document being in a file in memory;

display a plurality of original document visual objects of said ~~[[an]]~~ original document;

insert into the original document file a plurality of visual cue objects corresponding to print job ticketing parameters, thereby creating an amended document, and display the plurality of visual cue objects; ~~[[and]]~~

remove from the amended document, for specific operations to be performed on the amended document, at least one of the plurality of visual cue objects;

include removed visual cue objects in a print job ticket responsive to ~~[[and]]~~ performing the specific operations; and

forward said amended document and said print job ticket to a printer for printing said amended document responsive said print job ticket.

10. (currently amended) The product of claim 9 wherein the specific operation is a save operation saving said print job ticket to storage for subsequent forwarding to print.

11. (currently amended) The product of claim 9 wherein the specific operation is initiating an immediate ~~[[a]]~~ print operation.

12. (currently amended) The product of claim 9 wherein said insertion further includes inserting into said file an unseen marker with each of the plurality of visual cue objects, each said unseen marker and not being displayed, and wherein said removal of the at least one of the plurality of visual cue objects further includes locating the unseen marker in said file.

13. (currently amended) The product of claim 9 wherein said insertion further includes maintaining a list of each of the plurality of visual cue objects inserted in said file and

wherein said removal of the at least one of the plurality of visual cue objects further includes referencing the list and identifying the at least one of the plurality of visual cue objects to be removed from said file.

14. (currently amended) The product of claim 9 wherein document viewing application is a document editor and said insertion and removal are performed by a plug-in to said ~~[[a]]~~ document editor providing a plug-in interface.

15. (currently amended) The product of claim 14 wherein the plug-in is further effective to apply certain of the print job ticketing parameters to all pages of the document file.

16. (currently amended) The product of claim 14 wherein the plug-in is further effective to apply certain of the print job ticketing parameters to selected pages of the document file.

17. (previously presented) A method as in claim 1, wherein said step of inserting further includes displaying the plurality of visual cue objects in thumbnails.

18. (previously presented) A method as in claim 6, wherein said step of inserting further includes displaying the plurality of visual cue objects in thumbnails, said plug-in further monitoring said thumbnails for current page selection.

19. (previously presented) A program product as in claim 9, further comprising program instructions that cause the processor to display the plurality of visual cue objects in thumbnails.

20. (previously presented) A program product as in claim 19 further comprising program instructions that cause the processor to display the plurality of visual cue objects in thumbnails, said plug-in further monitoring said thumbnails for current page selection.
